Please do not include crop marks. Any ad that has image or color going to the trim size needs to have an additional .25" bleed on all sides to adjust for the paper shifting in the trimming process (options listed above marked "w/Bleed" include bleed dimensions). Also, please be sure to not place necessary text and/or logos outside of the Image Safe Area†, which runs the risk of getting cut off by the printer and/or the spiral binding.

†Please contact sales rep for design templates that show placement of spiral binding and safe area.

File Formats

High-resolution PDF files are the preferred format. Ads should be submitted as press-ready PDF files. Please ensure that all fonts and/or images are embedded.

Native Files: Ads may also be submitted as native files using recent versions of Adobe InDesign, Adobe Illustrator or Adobe Photoshop files. All supporting logos, images, graphics and fonts used in the ad must be included with the file. If font files cannot be provided, type must be outlined/rasterized before sending.

Color

All colors must be CMYK. Total ink density should not exceed 300%.

Pantone (PMS) colors and metallic ink need to be converted to CMYK color mode.

Resolution

All images and logos must have a minimum resolution of 300 dpi (1200 dpi for bitmap graphics) at 100% print size.

File Submission

If files are larger than 5MB in size, they cannot be emailed to us and must be sent via our FTP (see info below). If files are smaller than 5MB, you can either email them to the production department at production@tradeshowexecutive.com or upload them to our FTP. If you do not receive confirmation of receipt within 24 hours, please call us directly to confirm files were received. All ad materials will be pre-flighted and you will be contacted if any items are flagged for adjustment.
